PROFESSIONAL SUMMARY:

Mr. McCavit worked for Celanese Chemical Company for over 35 years. Most of his time was spent in operations and technical management in three different plant sites. From 2000 until his retirement in 2005, he provided strategic process safety management direction for Celanese as the Manager of Process Safety.

Following the BP Texas City explosion in 2005, he served as the Baker Panel's technical project manager, participated in technical reviews, and coordinated the review teams' efforts with other Panel activities. He also served as a part of the team that monitored BP's implementation of the Baker Panel recommendations.

He served as chair of the CCPS committee responsible for the development of Guidelines for Risk Based Process Safety.

AUDITING AND ASSESSMENT BACKGROUND:

Mr. McCavit served as a process safety auditor in Celanese beginning in 1992. As Manager of Process Safety for Celanese from 2000 to 2005, his duties included managing the PSM audit process. Since 2005 he has conducted process safety management system assessments for several companies.

EDUCATION / TRAINING:

Bachelor of Science in chemical engineering from Texas Tech University
