

# ENERGY WORKS

The U.S. oil and natural gas industry supports more than 9 million jobs nationwide, supports over 7% of GDP,<sup>1</sup> and contributes more than \$86 million to the Federal Treasury every day.

## KANSAS

The people of the oil and natural gas industry are a critical part of Kansas's economy.

### What does this currently mean for Kansas...

116,070	Total statewide jobs provided or supported by our industry <sup>1</sup>
\$63,407	Average salary for non-gas station oil & natural gas employees <sup>2</sup>
\$39,431	Annual average salary in KS across all industries and sectors <sup>2</sup>
\$5.8 billion	Contribution to KS labor income <sup>1</sup>
\$14 billion	Contribution to KS economy <sup>1</sup>

### However, with sensible energy development and sound tax policies, Kansas could realize...<sup>3</sup>

- **3,224** additional jobs created by 2015 and **6,832** additional jobs created by 2020 supported by oil and natural gas industry operations in KS
- An average of **\$8.8 million** of new, additional revenue generated by the industry directly to the state every year through 2030

That's enough money to cover nearly all of Kansas's General Fund contribution to the Department of Agriculture every year<sup>4</sup> – **all without using additional taxpayer dollars.**

A Harris Interactive poll released in January 2012 found that **70** percent of American voters favor increased access to U.S. oil and natural gas resources, and similar numbers believe more oil and natural gas development would provide major benefits to the nation, including more U.S. jobs.<sup>5</sup>
