The third quarter 2017 gross earnings tax is 14.3 cpg. "Other Taxes" column for gasoline includes petroleum gross receipts earnings tax collected at the wholesale level. The gross receipts tax is 8.1%, but is not assessed on diesel, biodiesel, or straight ethanol. The petroleum gross receipts earnings tax is capped at \$3 per gallon per SB 457 Conn. General Statute § 12-587(a)(2) enacted in 2012. The state is calculating the gross receipts tax on \$3 wholesale gasoline and not the amount in excess of \$3. With this \$3 per gallon cap, the maximum amount of the other fees would be 26.4 cpg and would be less when the price of gasoline falls below \$3 per gallon. Failure to cap the tax at \$3 per gallon would constitute a violation of the state price gouging statute. |

This report is intended to help consumers understand the "set costs" of a gallon of gasoline and which of the costs are from either from the various state taxes on a gallon of gasoline or federal taxes. Rates are rounded to the nearest hundredth decimal.

NOTE: For states with sales tax on fuel, price per gallon calculated based on AAA average prices for 10/1/2017.

Tax rates and/or notes changed since last report: AK, CA, IL, HI, IA, MI, NV, NY, WI.

NOTE: States that assess a percentage tax based on the price of gasoline rather than a straight cents-per-gallon rate are impacted the most.
