Production Safety Systems (T2) Refresher Supplemental Evaluation Criteria (INSTRUCTOR-LED)

Rev. 2   02-05-2013

1   Student Course Prerequisites

1.1 The training provider shall maintain a procedure for verifying and documenting that students taking a Production Safety Systems (T2) Refresher Course have met the following prerequisites:
   a. 6 Years offshore (OCS) oilfield experience
   b. Successful completion of two instructor-led PSST (T2) courses
   c. Possession of current, valid Production Safety Systems (T2) certification.

2   Course Structure & Content

2.1 For Production Safety Systems (T2) Refresher Courses only, the training provider shall ensure that students receive a minimum of four (4) hours instruction before taking the exam.

2.2 Course content shall follow the guidelines as outlined in Section 3.1 of API RP T2.

3   Student Evaluations

3.1 The training provider shall include in evaluations or practice exercises related to abnormal conditions resulting from process system malfunctions; relevant government regulations; and safety devices as described in API RP T-2, Sections 3.2, 3.3, and 3.4 respectively.

3.2 The training provider shall establish and document that the minimum written examination passing score is 90%.

3.3 The training provider shall administer a written examination equivalent to the Production Safety Systems (T-2) Basic course with a minimum of one hundred (100) questions. No pre-test shall be administered.

3.4 The training provider shall establish and document that written examinations are to be closed book.

3.5 The training provider shall establish and document that the minimum hands-on (practical) examination passing score is 100%.

Note: This form adds additional RP 2D course requirements to the current revision of Criteria for the Certification and Administration of the API Training Provider Certification Program. It only applies to Operation & Maintenance of Offshore Cranes (RP 2D) courses.
