

ENERGY IS...

# SOUTH DAKOTA

## SOUVENIR CENTRAL!

**CUPS:** PET, a thermoplastic polymer resin, derived from petroleum, in which Wall Drug's world-famous "free ice water" is served.

**THE 'JACKALOPE':**

Fiberglass, glass fiber-reinforced plastic derived from petroleum, in the mythical figurine out front.

**FUELS:** Gasoline and diesel powering vehicles bringing thousands of visitors a day.

**PAINT:** Petroleum is used to make the paint that brings Wall Drug's miles of color billboards to life.

## Energy is Everything.

In virtually every human activity and invention, energy plays an important role: powering, building and improving the quality of everyday life.

**Yes, even South Dakota's Wall Drug, with its legendary "jackalope," illustrates this point.**

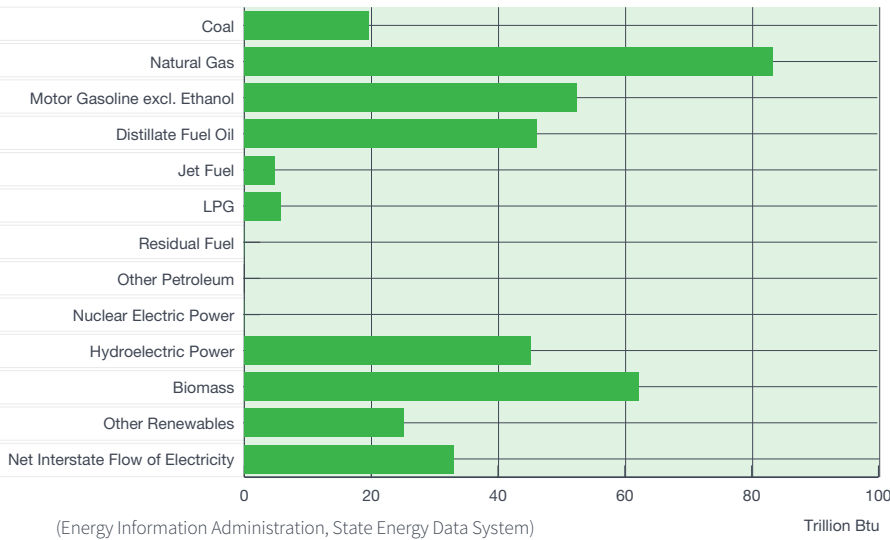

From the hand-painted billboards along Interstate 90 to the 6-foot fiberglass half jackrabbit, half antelope out front, Wall Drug is an experience that's based on lots of energy, entertaining hundreds of thousands of travelers each year.

### QUICK FACTS:

## ON THE ISSUES

### INFRASTRUCTURE

**Mike Rounds**  
U.S. Senator

“[P]ipelines provide an effective and efficient means of transporting natural resources and meeting our country’s energy needs. Good domestic energy policies include an ‘all of the above’ approach that will strengthen our economy, create jobs and enhance U.S. energy independence.”

### INFRASTRUCTURE

**Kristi Noem**  
U.S. Representative

“Access to energy is central to improving our national security and building a more robust economy that offers better jobs and higher wages.”
