

ENERGY IS...

NEW JERSEY

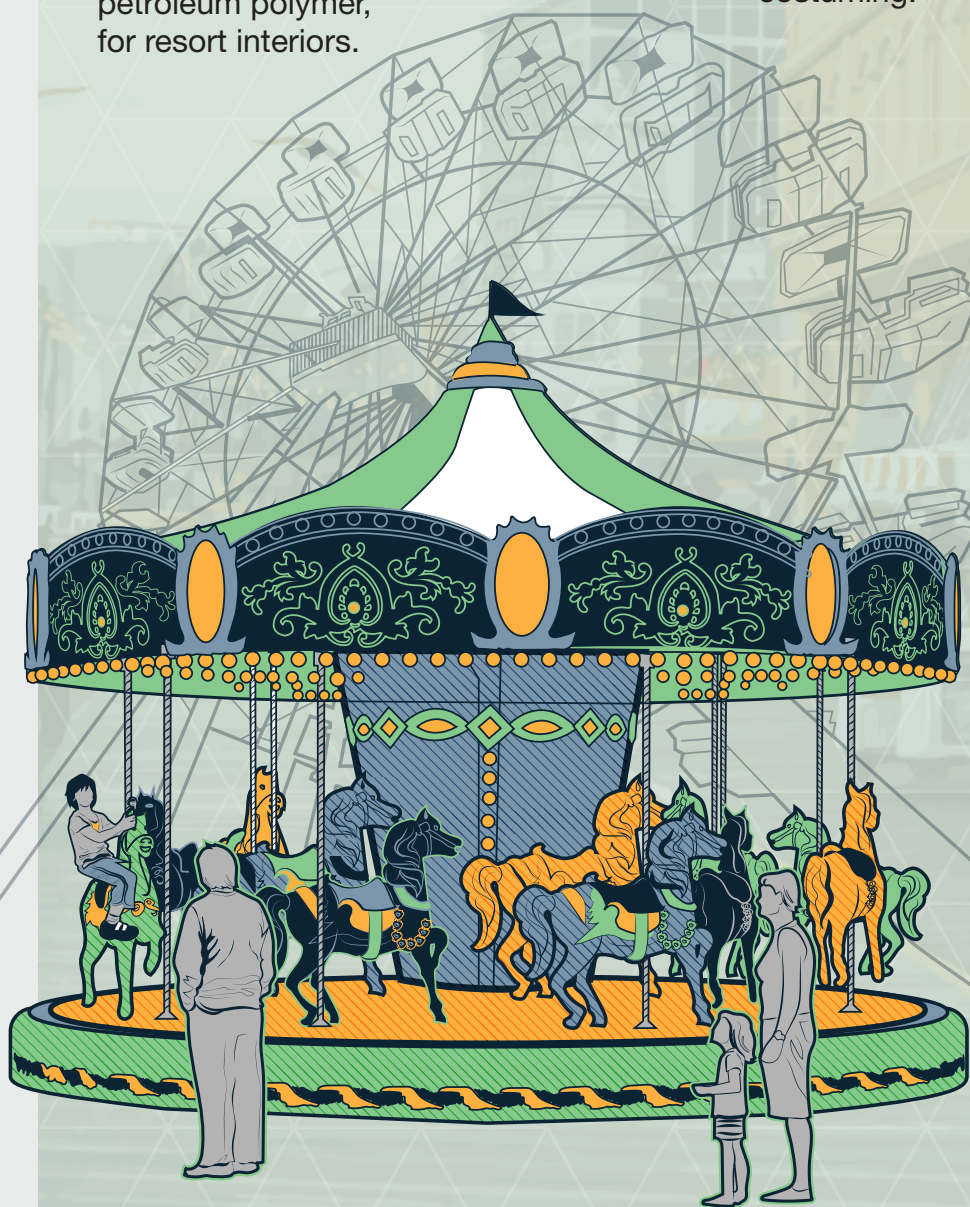

FIX YOUR HAIR UP PRETTY!

INSIDE STRAIGHT: Plastic coating for smooth-handling playing cards, made from natural gas and petroleum.

CARPETS: Made with nylon fibers, a petroleum polymer, for resort interiors.

SEQUINS: Made from ethylene, derived from natural gas, for costuming.

THRILLS: Natural gas is New Jersey's leading fuel for generating the electricity that powers rides at Steel Pier.

Energy is Everything.

In virtually every human activity and invention, energy plays an important role: powering, building and improving the quality of everyday life.

Hitting the attractions in Atlantic City helps illustrate the point.

Whether it's the high-rise resorts or the Boardwalk or Steel Pier, energy is integral to making one of the East Coast's premier shore venues hum with excitement. From amusement rides to gaming table playing cards, energy brings it.

QUICK FACTS:

- Atlantic City was home to America's first boardwalk, built in **1870**.
- Atlantic City has more than **15,000** hotel rooms. It attracts **27 million** visitors a year, according to visitnj.com.
- The properties in the Monopoly board game are named after Atlantic City streets — a couple of which no longer exist (Illinois Avenue, St. Charles Place).

ON THE ISSUES

INFRASTRUCTURE

Raymond M. Pocino

LiUNA

“New Jersey’s economic health is uniquely tied to the health of its infrastructure. Because of this, the modernization of PSE&G’s aging [natural] gas infrastructure will be a long-term, positive investment that will increase the state’s job growth and yield both economic and environmental benefits for years to come”

NATURAL GAS MARKETS

Tony Russo

Commerce and Industry
Association of New Jersey

“Natural gas has an important role to play beyond heating our homes and cooking our meals. It’s often overlooked as the fuel that now powers more than half of New Jersey’s electricity, with fewer emissions, greater reliability, and lower costs than traditional fuels.”
