

ENERGY IS...

ALABAMA

PULL UP A CHAIR!

SHADE: Polyester for portable canopies, made from petroleum.

CUPS: Plastics, made from natural gas and oil

TABLES & CHAIRS: Polyethylene in plastic surfaces and chair frames.

TATTOOS: Polyethylene (again!) for temporarily applying the school logo to cheek

FUEL: Propane for portable grilling and getting there.

Energy is Everything.

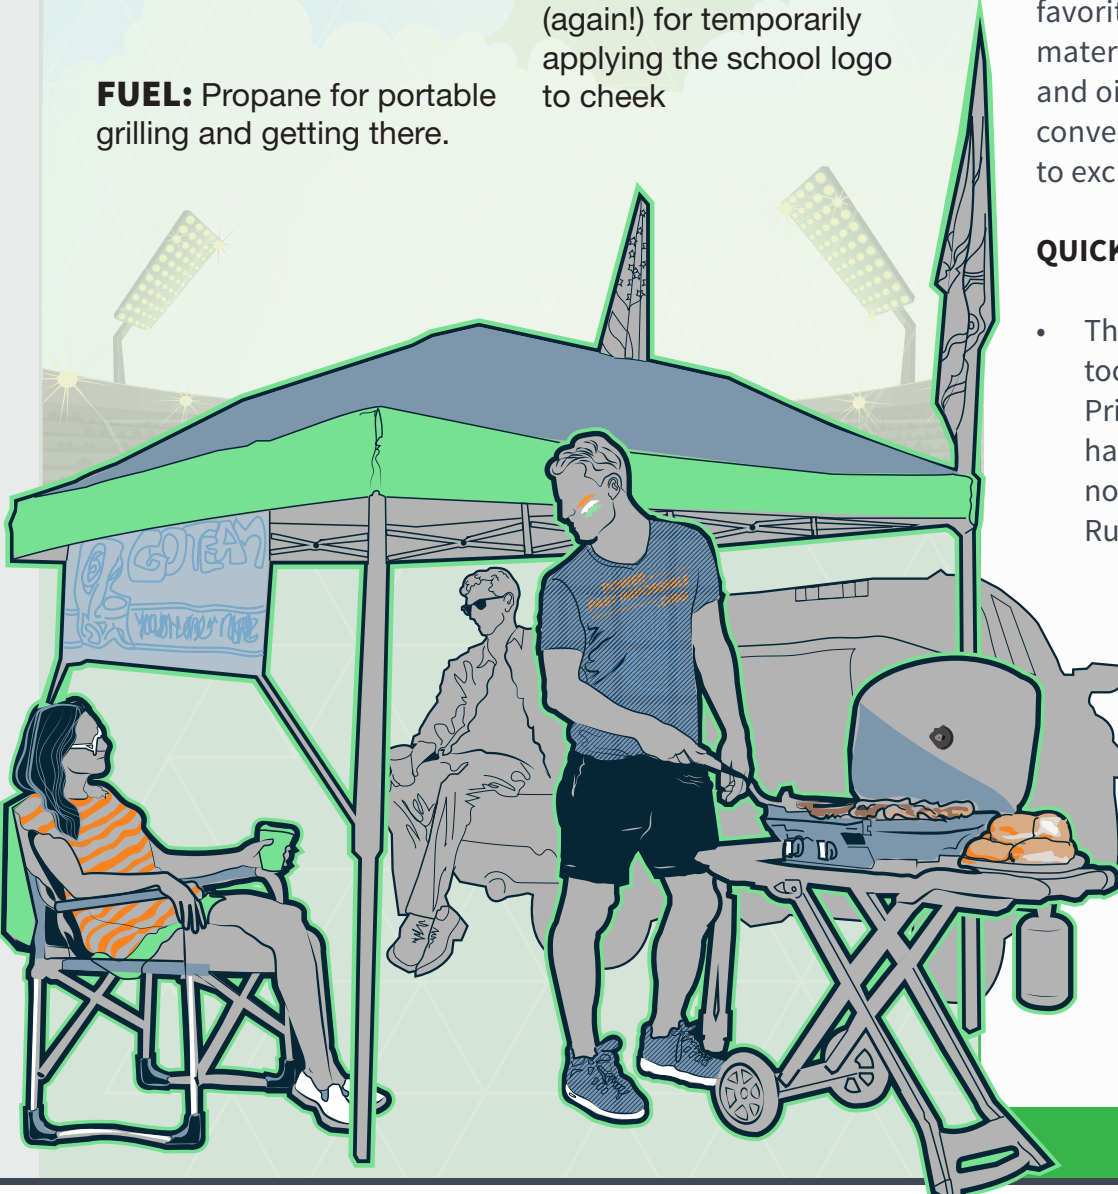

In virtually every human activity and invention, energy plays an important role: powering, building and improving the quality of everyday life.

Tailgating at a college football game helps illustrate the point.

Fuel for grilling, canopies for shade, coolers for chilling your beverage of choice, the game-day gear of your favorite team -- all are linked to materials derived from natural gas and oil. Energy makes tailgating fun, convenient and the perfect prelude to exciting college football.

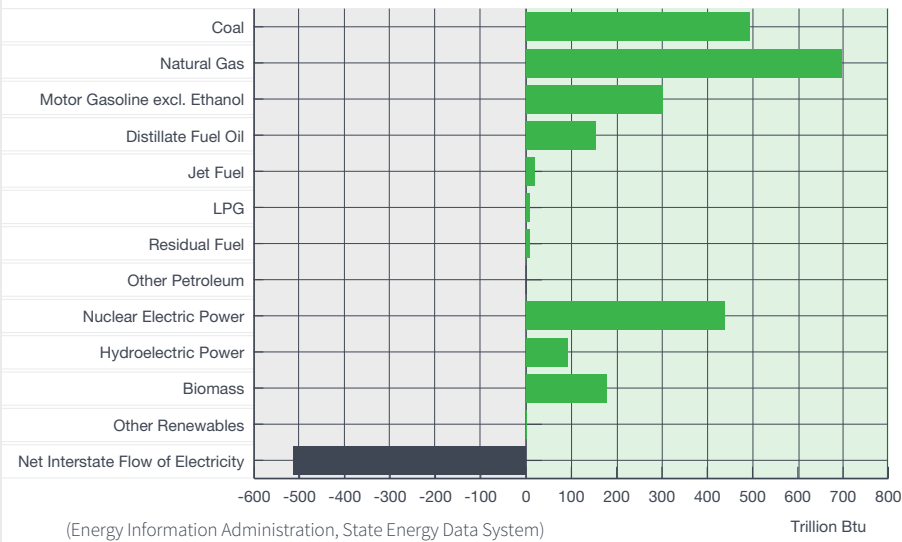

QUICK FACTS:

- The first college football game took place in **1869** between Princeton and Rutgers. Each team had **25** players on the field, and no forward passing was allowed. Rutgers won 6-4.
- The Associated Press college football poll began in **1936** and has played a role in determining the national champion every year since.
- Alabama leads the all-time football series with in-state rival Auburn **45-35-1**.
- Oklahoma's **47-game** winning streak (1954-57) is the longest in college football history.

ON THE ISSUES

ACCESS

Richard Shelby
U.S. Senator

“Offshore development has undergone rapid technological innovation ensuring it is cheaper, safer, and provides access to previously out-of-reach areas. Offshore leasing benefits the economies of all of the states, helps reduce the federal deficit, provides affordable energy to families and businesses, and strengthens our national security.”

PRODUCTION

Martha Roby
U.S. Representative

“American energy production is essential to generate job growth, lower the cost of energy, and free our nation from a dependency on foreign sources of energy.”
