## Overall Program Growth

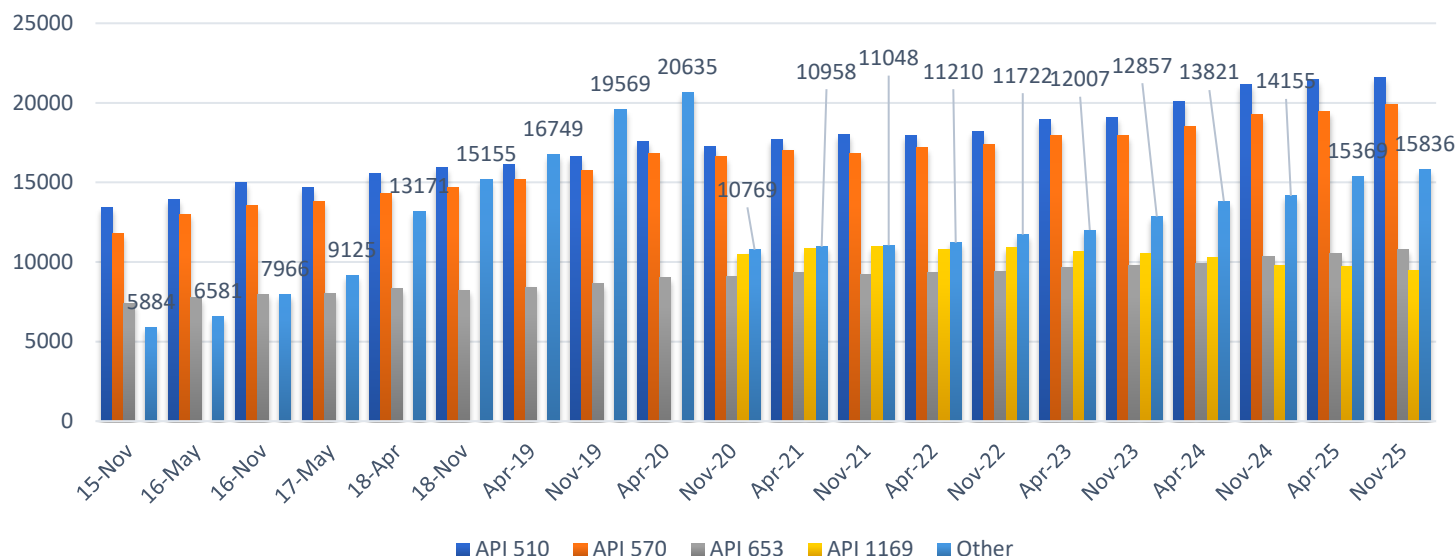

Figure 1 in November 2020, ICP separated API 1169 from the other category into its own category to track progress. This resulted in a readjustment and appearance of a drop in the Other category.

### Overall Growth:

Total certifications for the Individual Certification Programs (ICP) have increased by approximately 19.5% over the last five years. The table above shows consistent growth across each reporting period, with a steady upward trend reflected in the chart below. The core programs—API 510, 570, and 653—continue to lead in overall volume, maintaining steady growth throughout the periods, and contributing significantly to ICP’s expansion, especially with notable gains from April 2023 onwards.

### Strong Growth Programs:

Specialized certifications such as API 580, 571, 577, and 936 have demonstrated growing interest in technical domains, with substantial increases in participation over the past three years. API 1184, launched in November 2022, has seen rapid adoption, growing from 77 certificants at its inception to 692 currently. This marks one of the strongest new program launches in recent years.

The Source Inspector programs show a pattern of slow but steady growth. Notably, the Source Inspector for Fixed Equipment, which previously declined, began to rebound in April 2025. Meanwhile, the Source Inspector for Rotating Equipment has maintained a consistent upward trajectory in certification numbers.

### Special Mentions:

API 1169 certification peaked in November 2021 but has since experienced a gradual decline, with participation stabilizing following the CEPA and INGA mandates. In 2024, the “QUTE” series was overhauled, resulting in the consolidation and relaunch of the programs as QUTE (M) and QUTE (PA), streamlining previous offerings and aiming to better serve participants moving forward.

Figure 2 Chart reflects certifications held in each program and participation over the last 5 years. The QUTE programs were consolidated in 2025 to the QUTE (M) and the QUTE (PA). The QUTE, QUSE, QUPA and QUSE-PA programs will be sunset. Certificant holders in those programs, will be given to the end of their most current certification period to recertify into one of the two new programs. API 982 was introduced in August 2024. In August of 2025, ICP launched the Bolted Flange Joint Certifications with the Inspector program that currently has 21 certified. The Assembler certification will be launched in 2026.

## Certified Inspectors Worldwide

There are 43,331 certification holders in 133 countries.

## Percentage Breakdown of Certified Inspectors

*Reporting as of April 2025.*

Recent years have shown notable fluctuations in foreign markets. In 2023, foreign markets experienced a significant increase, with over 1,000 new certificants. This upward trend continued into early 2025, as the proportion of certificants from foreign markets steadily rose compared to North America. Meanwhile, North American markets, including the USA and Canada, have seen a decrease in certification holders. This shift underscores growing international interest and expansion, while domestic numbers in North America have slowed.

## Certificants by Generation

Millennials make up the core of certificants with an average age of 38. They overshadow Gen X and Baby Boomers combined. Over the last 18-20 months, we have seen a steady rise of Gen Zs entering the market. This is a good sign as we see more of the Baby Boomers age out of the industry.
