RE: API Specification 10D – Specification for Bow-string Casing Centralizers

Please be advised that effective January 1, 2020, API will remove API Specification 10D – *Bow-string Casing Centralizers* from the Monogram Program. At that time, organizations with a Monogram license under API Specification 10D shall cease applying the API Monogram on the applicable Casing Centralizers.

The removal of API Specification 10D from the Monogram Program is necessary considering that the document does not address the minimum Functional / Technical specifications and Manufacturing requirements necessary for the manufacturing of the products.

Current API Specification 10D licensees have the following options:

1. Transition to a registration under API Spec Q1, 9th Edition, and/or ISO 9001:2015. You may apply for a QMS Registration that includes the testing of Casing Centralizers within the scope. Please complete an [APIQR Registration Program Requirements](#) form and submit it to certification@api.org. There will be no application fees for applications received prior to October 1st, 2019.
2. Take no further action, resulting in the withdrawal of your API Specification 10D license on January 1st, 2020.

Please note: If you are currently in the application stage for licensing under API Spec 10D, your application will be withdrawn. You will be contacted with further details concerning fees paid for the application.

For Monogram related questions regarding the removal of API Specification 10D, please send all inquiries to certification@api.org.

Sincerely,

Sharon Bowie
Manager, Monogram/APIQR
