Please place a check mark (✓) in each box that corresponds to the products you are applying to manufacture and monogram. (If using electronic PDF form, click your mouse in the corresponding box and the check mark will appear.)

¹ Per clause B.2.3.1, sulfate resistance grade of the finished well cement class is determined by applying the formulas of Section 4, Table 1 on the chemical composition of the mass fraction of the Portland cement clinker or cement used.

² No sulfate resistance grades specified.
