# API Monogram Program Alternative Marking of Products License Agreement

## Part 1 – Scope

---

The API Monogram® Program allows an API Licensee to apply the API Monogram to applicable products that fall within the scope of the program. The use of the API Monogram on these products constitutes a representation and warranty by the Licensee to purchasers of the products that, as of the date indicated, the products were produced under a verified quality management system and in accordance with the applicable API product specification(s) in effect at the time of manufacture. API Monogram Program Licenses are issued only after an on-site audit has verified that the Licensee has demonstrated that it meets the requirements described by API Specification Q1 at all times, and that it has demonstrated capability to satisfy the requirements of the applicable API product specification(s) and API Monogram license agreement.

The purpose of this document is to establish the requirements for application of the API Monogram to eligible products. API is the owner of all rights to the certification mark (hereinafter “the API Monogram”) relating to API’s Monogram Program. Under the terms set forth in the API Monogram Licensing Agreement, API grants to the Licensee a non-exclusive non-transferable license to use the API Monogram on the types of products set forth in the Certificate of Authority to Use the Official API Monogram provided that these products are made in accordance with the requirements set forth in the API Product Specification in effect at the time of manufacture associated with the assigned license number, API Specification Q1, Specification for Quality Programs for the Petroleum, Petrochemical and Natural Gas Industry, and the API Monogram Program Requirements, including any amendments, modifications, substitutions or interpretations. The Agreement is applicable only to Licensee’s product(s) that are made at the Licensee’s facility under controls specified in applicable marking procedures that have been developed and maintained by the Licensee.

However, API recognizes that there are certain manufacturing processes or types of products that may lend themselves to alternative API Monogram marking procedures and controls. In particular, there may be instances where a licensee may want to have the API Monogram and its license number applied at a different location (facility) than that covered by the applicable API License. This document sets forth the requirements for application of the API Monogram under those circumstances.

## API Monogram Program Alternative Marking of Products License Agreement

### Part 2 – General API Monogram Marking Requirements

---

**Each Licensee shall control the application of the API Monogram in accordance with the following:**

1. Each Licensee shall develop and maintain an API Monogram Marking Procedure that documents the marking/monogramming requirements specified by the API product specification to be used for application of the API Monogram by the Licensee. The marking procedure shall define the location(s) where the Licensee shall apply the API Monogram and require that the Licensee's license number and date of manufacture be marked on monogrammed products in conjunction with the API Monogram. At a minimum, the date of manufacture shall be two digits representing the month and two digits representing the year (e.g., 05-08 for May 2008) unless otherwise stipulated in the applicable API product specification. Where the API product specification contains no marking requirements, the Licensee shall define the location(s) where this information is applied in the marking procedure.
2. The API Monogram may be applied at any time appropriate during the production process (provided that the product remains under the control of the Licensee) but shall be removed in accordance with the Licensee's API Monogram Marking Procedure, if the product is subsequently found to be nonconforming with API specified requirements. Products that do not conform to API specified requirements shall not bear the API Monogram.
3. Except for the situations outlined in Part 3 of this document, only an API Licensee may apply the API Monogram and its license number to products eligible for the API Monogram and the API Monogram shall only be applied at the licensed facility.
4. The authority responsible for applying and removing the API Monogram shall be defined in the Licensee's API Monogram Marking Procedure.

## Part 3 – Alternative API Marking Controls

---

In some cases, there may be instances where alternative marking controls may be used. These controls are subject to API license requirements, API Specification Q1, and other API specifications and requirements.

### General

1. In the event that an API Monogram is to be applied at a location not identified in the API License Agreement, Licensees must provide prior written notification to API, and secure API approval, prior to marking. Prior to marking, the Licensee shall enter into an agreement ensuring quality control over the marking process with any Marking Party, **and any Marking Parties shall obtain authorization from API.**
2. All facilities involved in an API Monogram Alternative Marking Agreement shall be subject to audit by API at API's discretion.
3. API reserves the right to require more frequent audits (at the Licensee's expense) for Licensees with an approved API Monogram Alternative Marking Agreement.
4. API reserves the right to have a representative present at any location when the API Monogram is applied.
5. API reserves the right to deny or revoke the rights granted under the alternative marking arrangements if adequate quality control over the marking process cannot be demonstrated or maintained by the Licensee and/or the Marking Party.

### Eligible Processes and Products

API has determined that it can ensure that finished products will meet API specifications, while addressing the demonstrated need for flexibility in certain circumstances. In some instances, alternative marking procedures and controls may be developed and deemed to be acceptable for certain manufacturing processes or types of products. The current processes and products eligible for API Monogram Alternative Marking Agreement are shown in Table 1. The items listed are the minimum controls that shall be defined and documented by the Licensee. Additional controls may be required by API prior to approval.

Requests for application of this alternative marking program to other product lines will be considered and evaluated by API on a case-by-case basis. API requires support for any request in the form of: (1) documentation of an actual need for such a marking program, and (2) evidence that indicates that the original licensee will be able to ensure that the new product will meet the API specification.

### Contractual Relationships

1. **General:** Any entity that applies the API Monogram (Marking Party) to eligible products must have a contractual arrangement with API and the original Licensee. There shall be no assignment or delegation of API license rights or responsibilities from the original Licensee to the Marking Party.
2. **API Monogram License Agreement:** The API Monogram License agreement is a contract between API and the Licensee which among other things, grants a Licensee the right to apply the API Monogram to products that meet the API product specification requirements and that were produced under a quality management system that conforms to API Specification Q1.
3. **Marking Agreement:** If the API Monogram is applied by a party other than the original API Licensee, or at a facility not identified on the original API License, as per any scenario detailed in Table 1, the Marking Party shall enter into a contractual arrangement with the original API Licensee that ensures that final products meet the appropriate API specification(s). The marking party shall also obtain an API Monogram Alternative Marking Agreement, prior to marking any product with the API Monogram.
4. **Licensee Responsibility:** The holder of an API License shall be responsible for any final product meeting any applicable API specification, including all marking requirements. The Marking Party shall be responsible for maintaining sufficient controls to ensure that products marked with the API Monogram meet all applicable API product specifications.

4. Licensee agrees to permit the use of the API Monogram and applicable license numbers on products to Marking Party only as specified by API and controlled by Licensee's pertinent procedures. The Licensee agrees that it and Marking Party will use the API Monogram only on Licensee's products that meet all of API's requirements and agrees to assume full and complete responsibility for use of the API Monogram on its products. Licensee shall enter into an agreement allowing the Marking Party to use the Licensee's API License Number in conjunction with and only in conjunction with the marking of the Licensee's products. Licensee shall remain responsible for ensuring that all products meet the requirements of Licensee's license agreement.

The frequency of the periodic audits will be at the discretion of API. Marking Party agrees to permit API, or any approved API auditor to conduct such audits. Marking Party agrees that API's representatives shall, after giving reasonable notice, have the access to the facilities covered by this Agreement in order to perform these audits.
6. Marking Party agrees to immediately cease applying the API Monogram and notify API if:
  - (a) It has evidence or information which indicates that Licensee's products displaying the API Monogram do not conform to API's requirements, or
  - (b) It has evidence or information that Licensee's quality management system does not meet API requirements, or

The Marking Party agrees to notify API in writing of any infringements or limitations by third parties of the API Monogram which may come to the Marking Party's attention. 9. Marking Party agrees that API is to rely upon Marking Party's representations in granting the Licensee the authorization to use the API Monogram at the Marking Party's facility. Marking Party agrees that if any action or proceeding is brought by API to enforce, protect or establish any right or remedy with respect to this Agreement (including, but not limited to, the failure of the Licensee to pay applicable fees or audit costs) or with respect to the subject matter of this Agreement or with respect to the equipment that is manufactured at the Facility, API shall be entitled to recover damages and reasonable attorney's fees and costs.
