

# Oil and Natural Gas Stimulate Alaska Economic and Job Growth

Oil and natural gas are driving the U.S. economy through a major energy boom and that boom is rippling through the economy of Alaska, supporting business activity across the state. This finding grows out of a new American Petroleum Institute survey of domestic oil and natural gas vendors,<sup>1</sup> which offers a glimpse into the job and business creation engine that is the current oil and natural gas industry. The survey shows that at least 505 businesses, spread across Alaska's at-large congressional district, are part of the larger oil and natural gas supply chain.

The survey's snapshot of state-by-state activity reinforces the impressive level of industry success throughout the country that is documented in a recent PriceWaterhouseCoopers study conducted for the American Petroleum Institute.<sup>2</sup> The study found that the oil and natural gas industry in Alaska supports some 56,600 jobs, which is 11.9 percent of the state's total employment. The amount of Alaska labor income supported by the oil and natural gas industry comes to \$4.5 billion annually. That's 12.6 percent of the state's total labor income.

Another way in which the oil and gas industry benefits the people of Alaska, in

addition to total employment and labor income, is in terms of salary.<sup>3</sup> While the average annual salary in Alaska across all industries and sectors is \$50,624, the average salary in the oil and gas industry (excluding gas stations) is very significantly higher—\$125,794 annually.<sup>4</sup> Overall the industry supports \$19.3 billion of the Alaska economy. That's 34.7 percent of the state's total economic activity.

Alaska ranks 4th in oil and 11th in natural gas production.<sup>5</sup> That makes it one of the nation's top energy-producing states.

1. American Petroleum Institute, "API Onshore Oil and Gas Vendor Identification Survey," Washington, D.C., 2014. The survey was distributed to API members in January 2014 to collect information for the period October 2012 to September 2013. Included are companies that provide goods and services for onshore oil and natural gas development, whether as operators, contractors, service companies, suppliers, or vendors.
2. PriceWaterhouseCoopers, "Economic Impacts of the Oil and Natural Gas Industry on the U.S. Economy in 2011," Washington, D.C., July 2013. Prepared for API using the IMPLAN input-output modeling system, based on 2011 U.S. Bureau of Economic Analysis data.
3. Information cited in this paragraph comes from the Bureau of Labor Statistics, Quarterly Census of Employment and Wages (preliminary data for 2013 accessed July 2014); and PriceWaterhouseCoopers, "The Economic Impacts of the Oil and Natural Gas Industry on the U.S. Economy: Employment, Labor Income and Value Added," 7/12/13 (based on 2012 IMPLAN database).
4. Data includes NAICS code 324, which may count some coal product manufacturing jobs.
5. EIA, "Rankings: Crude Oil Production, April 2014 (thousand barrels)," accessed 7/31/2014. <http://www.eia.gov/state/ranking/?sid=UA#/series/46>. EIA, "Rankings: Natural Gas Marketed Production, 2012 (million cubic feet)," accessed 7/31/2014. <http://www.eia.gov/state/rankings/?sid=US#/series/47>.

At Large Congressional District	505
<b>Grand Total</b>	<b>505</b>

### Vendor Profile<sup>7</sup>

#### ASRC Energy Services, Inc

ASRC Energy Services is Alaska's leading provider of comprehensive oil and gas services. It offers a wide spectrum of services for all phases of the oil field life cycle, from exploration, permitting, and field development, to production optimization and decommissioning. In addition, the company provides offshore oil response equipment and resources, as well as marine services. More recently, ASRC entered the shale gas market in North Dakota, providing transportation and operations, as well as maintenance services, to operators in the Bakken formation.

The parent company of ASRC Energy Services, Arctic Slope Regional Corporation, is owned by and represents the business interests of its 11,000 Iñupiat Eskimo shareholders in eight villages across the North Slope of Alaska. As an Arctic Slope subsidiary doing business in the oil and gas industry, ASRC Energy Services has contributed greatly to the financial success of the Arctic Slope Regional Corporation. More important, this success has made it possible to give back to the company's tribal shareholders, the Iñupiat, through village and community economic development and job opportunities, as well as shareholder dividends that help offset the extremely high cost of living that comes with residing in a remote region of Alaska.

The Iñupiat people own title to nearly five million acres of land on the North Slope of Alaska that contains a high potential for oil, gas, coal, and base metal sulfides development. Although oil and gas development has financially benefited the region, a traditional subsistence lifestyle is heavily dependent on a healthy marine and terrestrial ecosystem unaffected by the activities of the oil and gas industry. As the company sees it, "As stewards of this land, we are able to provide clients with personnel who are extensively trained to prevent or mitigate damage to the environment. Our sense of stewardship and our training make us uniquely qualified to assist with responsible development."

And the people of Alaska get it. A state-wide telephone poll of 601 registered Alaska voters, conducted on behalf of the American Petroleum Institute, found

that 83 percent, regardless of party affiliation, support increased production of oil and natural gas resources located in the United States.<sup>6</sup>

6. "What America Is Thinking On Energy Issues." <http://www.api.org/news-and-media/news/newsitems/2014/may-2014/poll-large-majorities-of-alaska-voters-support-increased-production-of-domestic-oil-and-natural-gas>, the results of a state poll conducted by Harris for API May 14-15, 2014.
