

APIQR

WHAT IS THE APIQR PROGRAM?

The API Quality Registrar (APIQR) program recognizes manufacturers and service providers that prove they are capable of manufacturing or providing services in accordance with globally recognized management system standards:

- ✓ API Spec Q1 - Quality Management System Requirements for Organizations Providing Products for the Petroleum and Natural Gas Industry
- ✓ API Spec Q2 - Quality Management System Requirements for Service Supply Organizations for the Petroleum and Natural Gas Industries
- ✓ API 18LCM - Product Life Cycle Management System Requirements for the Petroleum and Natural Gas Industries
- ✓ ISO 9001 - Quality Management Systems
- ✓ ISO 14001 - Environmental Management Systems

THE APIQR MARK

The certified organization has successfully undergone and passed a management system audit, including reviews of requirements related to the registered scopes of the organization's management system.

API has verified that the certified organization has implemented, maintained and continually improved its management system to meet the applicable requirements of the standard(s) for which the organization is registered at the time of the audit.

The certified organization represents and warrants that its management system conforms to the applicable standards and registration requirements. The organization has implemented processes and controls to identify and address customer requirements, customer complaints and product issues.

THE APIQR MARKS CAN BE USED BY CERTIFIED ORGANIZATIONS

- ✓ Correspondence, advertising and promotional materials that are related to the goods and services identified in the scope of the organization's registration and to the approved quality management system.

THE APIQR AND ANAB MARKS CAN BE USED BY CERTIFIED ORGANIZATIONS

- ✓ Correspondence, advertising and promotional materials by organizations that are registered under ISO 9001 and ISO 14001, for which APIQR is accredited by the ANSI National Accreditation Board (ANAB).

THE APIQR MARK CANNOT BE USED

- ✓ Products or product packaging or related documentation or displayed in such a way as to suggest that the API, APIQR and ANAB have certified or approved any product, process, or service of the registered organization, or display in any other misleading manner. This includes packaging, laboratory tests, calibration or inspection reports, as such reports are deemed products in this context.

The API Composite List recognizes APIQR certified organizations that are eligible to use the registration marks. Organizations looking to purchase products or services meeting APIQR requirements should consult the globally recognized [Composite List](#) before making any purchases.
