

---

API Specification 5CT 11<sup>th</sup> edition, *Casing and Tubing*, was published in December 2023 and has a Monogram Program effective date of January 1, 2025. This latest edition of API Spec 5CT no longer makes reference to Product Specification Levels (PSLs), which were previously found in the 10<sup>th</sup> edition. API has been made aware that some organizations continue to be unaware of this change and that this lack of awareness has created some difficulties for the industry. Note that products manufactured on or after January 1, 2025 can only be Monogrammed if they were manufactured in accordance with the 11<sup>th</sup> edition.

To assist in the transition away from PSLs, members of the Subcommittee responsible for the development of API Spec 5CT have created a table, *API 5CT 10<sup>th</sup> Edition to 11<sup>th</sup> Edition – Removal of Product Specification Level Requirements*, to inform users of the specification how this change may impact them. As described in the table, the requirements associated with PSLs were either incorporated into the main body of the text, turned into a Supplemental Requirement (SR), or deleted entirely.

Note that the table and associated text and guidance are not official API publications and were not developed using the ANSI accredited consensus process. This table is being shared to increase awareness of the changes implemented in the 11<sup>th</sup> edition. Each organization should perform its independent review of the requirements of API Spec 5CT to determine what specific requirements will best suit its needs. API does not make any representation as to the accuracy of the information found in the table.

The table *API 5CT 10<sup>th</sup> Edition to 11<sup>th</sup> Edition – Removal of Product Specification Level Requirements* is attached to this notification and can be found on the [API myCommittees website for Subcommittee 5](#).

Moved to the body of 11th Edition  
 Moved to SR of 11th Edition  
 Removed from 11th Edition

API SCT 10th Edition to 11th Edition - Removal of Product Specification Level Requirements

Requirements can be agreed between manufacturer and purchaser to match PSL as per API SCT 10th edition

	SCT 10th Edition			SCT 11th Edition											
	PSL	Annex H	API 10th.Ed	J55	K55	N80-1	N80Q	R95	L80-1	L80-13	C90	T95	P110	Q125
