

API STANDARDS SUBSCRIPTION

A PRODUCTIVITY TOOL TO FURTHER SAFETY, REDUCE RISK AND LIABILITY

API is the global leader in convening subject matter experts across segments to establish and maintain consensus standards for the oil and gas industry. These standards further safety, efficiency, environmental protection, and sustainability.

API's online subscription platform that is the easiest way to get access to any and all of API's standards and specifications. The digital platform provides the latest updates, references, and comparison tools to ensure safety, compliance, and interoperability.

DYNAMIC REDLINES

Users can compare the most recent standard against the previous version and the flexibility to compare the current standard against any historical iteration available through the online subscription.

MULTIPLE LANGUAGES

The platform offers the ability to search in 13 languages, including: Russian, Spanish, Mandarin, and Portuguese.

HISTORICAL STANDARDS

For no additional charge, historical content is available for API and ASTM Standards.

UNLIMITED CONCURRENT USER LICENSES

All users from an office (or multiple offices) can view documents simultaneously, and there is no limitation as to the number of concurrent user licenses.

ANNOTATIONS

The platform provides the ability to create and share annotations (i.e. notes, spreadsheets, PDFs, images, etc.) within the HTML version of the standards.

UP-TO-DATE STANDARDS

The platform is updated with the latest standard versions and sends users notifications to help maintain compliance.

API's online subscription platform provides critical safety and compliance information directly to personnel by assisting in the decision-making process – reducing risk and liability to an organization.

- Ensures high-quality knowledge transfer among engineers and across an organization
- Closes information gaps between entry level engineers and professionals with decades of experience
