* Total D3+D7 RINs reported on EPA website, <https://www.epa.gov/fuels-registration-reporting-and-compliance-help/2014-renewable-fuel-standard-data> **

Memorandum from Dallas Burkholder, Office of Transportation and Air Quality, EPA, to Air and Radiation Docket EPA-HQ-OAR-2015-0111, *Assessment of Cellulosic Biofuel Production from Biogas (2015–2016)*, at 2 (Apr. 27, 2015). ***

These totals are slightly higher than the number of RINs reported in the 2014-2016 final rule, likely because they do not incorporate RIN generation error corrections. EPA reduced the total number of D3 and D7 RINs by 347,323 for 2014. ^ The

numbers in this category represent the maximum number of conventional liquid cellulosic biofuel RINs, rather than the actual number of such RINs, due to production of nonconventional cellulosic biofuels such as heating oil.
