The work of the problem-solvers of our industry is never done.
The API Cybersecurity Conference has been an annual event since 2006. For 15 years it has been the only cybersecurity conference dedicated to the oil and natural gas industry and has a loyal and dedicated attendee base. It is also volunteer-driven, both at the planning committee and speaker level. We consistently produce a compelling conference program, with a focus on safety, best practices, and innovation.

2020 will be a different API Cybersecurity Conference compared to past years, but one that is right for you. We are doubling down on innovation, introducing the API Virtual Event, allowing us to provide a compelling online experience incorporating the latest technology and API’s deep experience in engaging communities online.

**On the conference program side**, we will have a mix of live and pre-recorded presentations, live Q&As, polling, and additional features the vibrant technology allows. The content-focused work of the volunteer planning committee, made up of API member company subject matter experts, is what keeps our attendees coming back. That same planning committee is designing a strong 2020 program, including a Pandemic Response track.

**On the virtual exhibition side**, you will be given login access to create your own virtual booth. The platform has built-in scanning tools with a fully integrated virtual badge scanner and lead retrieval functions. Depending on your participation level, features can include the ability to upload presentations, .pdf flyers, videos, and links to your website. You can also access a friendly, powerful leads dashboard from your laptop or mobile phone, giving you real-time profile information on the leads as they are collected. Delegates can also easily “request information” from exhibiting companies, sharing their contact information, just like having their badge scanned at a live event. You will also be able to see who stopped by, for how long, and what they downloaded. A live Q&A feature, and most importantly, 1:1 Zoom meeting scheduling: Pre-schedule multi-person video conferences for informal “Birds of a Feather”-type meetups, allowing attendees to connect with your exhibit staff face to face.

All of this content, including the virtual exhibition, will live on the API Virtual Event for one calendar year following the event.

**You can participate with confidence**, knowing that you will reach the loyal, dedicated high-level audience this API conference is known for.

To purchase, simply visit the exhibitor information tab at [www.api.org/cybersecurityconference](http://www.api.org/cybersecurityconference).

ENTER VIRTUAL TRADESHOW BOOTH
Hewlett Packard

Description
HP is a technology company that operates in more than 170 countries around the world. We explore how technology and services can help people and companies address their problems and challenges, and realize their possibilities, aspirations and dreams. We apply new thinking and ideas to create more simple, valuable and trusted experiences with technology, continuously improving the way our customers live and work. No other company offers as complete a technology product portfolio as HP. We provide infrastructure and business offerings that span from handheld devices to some of the world’s most powerful supercomputer installations. We offer consumers a wide range of products and services from digital photography to digital entertainment and from computing to home printing. This comprehensive portfolio helps us match the right products, services and solutions to our customers’ specific needs.
