REAL COSTS OF THE RENEWABLE FUEL STANDARD.

HIGHER PRICES FOR CONSUMERS.¹
COULD DAMAGE CAR ENGINES.²

The RFS is broken. Lawmakers in both parties agree. So do the Washington Post, the Wall Street Journal and USA Today.

The RFS is a big government mandate that forces higher blends of ethanol in our gasoline. The consequences are enormous. It means increased prices on groceries and could raise the cost of gas.

Independent studies show higher ethanol blends could damage car engines on the road today. Potentially leaving drivers stranded.

THE RENEWABLE FUEL STANDARD IS BROKEN. TELL THE EPA: FIX THE RFS.
