NEW OZONE RULES COULD BE MOST EXPENSIVE REGULATIONS EVER

What Could New Ozone Regulations Cost Nebraska?¹

$4.7 Billion Gross State Product Loss from 2017 to 2040

3,293 Lost Jobs or Job Equivalents per year

NEBRASKA  | Nebraska would be in partially out of attainment*¹

* It Gets Worse for Counties in the Red and Orange
1. Manufacturers won’t be able to expand unless other businesses in the area shut down.
2. Federal highway funds could freeze.
3. Economic growth will halt.

Source: URS, July 7, 2014. Assumes all counties in a metropolitan, micropolitan or combined statistical area will be included in any potential nonattainment area. Some counties could be excluded and other included at the time of designation. Based on a 3-year period, 2011–2013.

Projected 8-Hour Ozone Nonattainment Areas

The recent study by NERA Economic Consulting found that a stricter ozone regulation at 65 ppb could cost the U.S.:¹

» $140 billion in lost GDP per year and $1.8 trillion from 2017 to 2040; and

» 1.4 million fewer jobs or job equivalents per year on average through 2040.

EPA SHOULD NOT CHANGE THE CURRENT OZONE STANDARDS

DON’T IMPOSE UNNECESSARY REGULATION
The U.S. government has a responsibility to keep federal regulations sensible and not change standards on businesses and consumers needlessly.

DON'T SET STANDARDS THAT CAN’T BE ACHIEVED BECAUSE OF BACKGROUND LEVELS
There are many areas of the country where the naturally occurring level of ozone is above what the EPA is considering, so it is not right to hold a county or state to a standard that is impossible to reach.

DON’T SET STANDARDS THAT THREATEN AMERICA’S COMPETITIVENESS AND AMERICAN JOBS
Tightening ozone standards could increase costs to the American public, reduce America’s ability to compete internationally, and threaten American jobs.

Costs could be even higher if EPA finalizes a 60ppb standard, which is included in the proposal. These standards could reduce U.S. GDP by $270 billion per year and $3.4 trillion from 2017 to 2040 and result in 2.9 million fewer jobs or job equivalents, according to a previous study by NERA Economic Consulting.

AIR QUALITY PROGRESS WILL CONTINUE
The nation’s air quality has improved over the past several years, and ozone emissions will continue to decline without new regulations.

HEALTH DATA SHOW THE CURRENT STANDARDS ARE PROTECTIVE
These new standards are not justified from a health perspective because the science is simply not showing a need to reduce ozone levels.
