Oil and natural gas development in the Atlantic could create **35,000 jobs** in South Carolina and raise over **$3.7 billion** for the state budget by 2035 with revenue sharing in place.

### WHAT THEY ARE SAYING ABOUT OFFSHORE OIL & NATURAL GAS IN South Carolina

**WHAT THE OFFICIALS SAY**

**Tim Scott, U.S. Senator**

“Safe, responsible energy production has the ability to transform our economy, creating thousands of new jobs in communities across the nation.”

**Nikki Haley, Governor**

“Exploring for energy off the coast is a critical economic development issue.”

**Jeff Duncan, U.S. Representative**

“(B) y producing energy in the Atlantic we can strengthen America’s energy security and lessen our dependence on Middle Eastern sources of oil.”

**Brad Dean, Myrtle Beach Area Chamber of Commerce**

“We may have substantial natural gas resources off our coast which can be secured in an environmentally-friendly manner, which would spur job creation and create economic growth.”

### SUPPORT FROM SOUTH CAROLINA VOTERS

71% of South Carolina votes, a bipartisan majority, support offshore drilling.

- **REPUBLICAN**: 78%
- **INDEPENDENT**: 70%
- **DEMOCRAT**: 62%

*Harris Poll of 604 registered voters on January 13-15, 2015*

### SEISMIC SURVEYS

The first step in exploring for offshore oil and natural gas resources is often conducted through seismic surveys, which are like ultrasounds of the earth. This safe and proven technology is also used by the U.S. Geological Survey, the National Science Foundation, and the offshore wind industry.

Anti-oil and gas activists are spreading misinformation about seismic surveys. Here’s what a top government scientist had to say about their claims.

**Dr. William Y. Brown, Chief Environmental Officer at the Bureau of Ocean Energy Management**

“I think those assertions are wildly exaggerated and not supported by the evidence.”

— National Geographic, August 9, 2014
