API Standard 17F

Standard for Subsea Production Control Systems

THIRD EDITION | MAY 2014 | 144 PAGES | \$220.00 | PRODUCT NO. G017F03

This standard is applicable to design, fabrication, testing, installation, and operation of subsea production control systems (SPCSs).

This standard covers surface control system equipment, subsea-installed control system equipment, and control fluids. This equipment is utilized for control of subsea production of oil and gas and for subsea water and gas injection services. Where applicable, this standard can be used for equipment on multiple-well applications.

Rework and repair of used equipment are beyond the scope of this part of this standard.

For ordering information:

Online: www.api.org/pubs

Phone: 1-800-854-7179
(Toll-free in the U.S. and Canada)

(+1) 303-397-7056
(Local and International)

Fax: (+1) 303-397-2740

API members receive a 30% discount where applicable.
